Three Roles and Contribution of Open Source for Cloud

自由軟體在雲端科技發展中的三大角色與貢獻

Role #1: The foundation of Cloud Services !

角色一：自由軟體是雲端服務的幕後技術基石

Contribution #1: Reduce IT Cost 貢獻一：節省軟體成本

Role #2: Interoperability Standard between Clouds !

角色二：跨越不同雲端服務的互通標準！

Contribution #2: Less Vendor Lock-In 貢獻二：減少技術壟斷

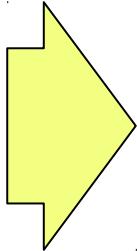

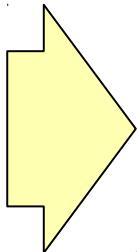

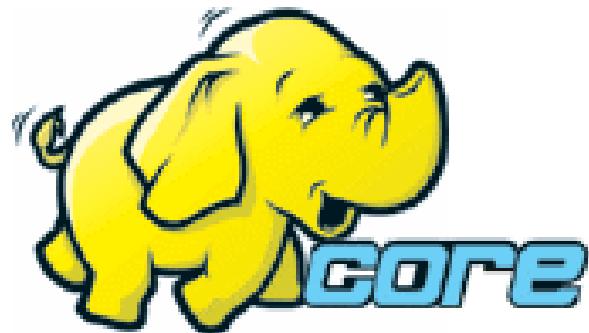

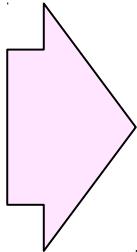

Role #3: Open Platform for Open Education !

角色三：雲端人才培育需要開放平台！

Contribution #3: Open Ladder to Cloud 貢獻三：搭建登雲天梯

Role #1: The foundation of Cloud Services !

角色一：自由軟體是雲端服務的幕後技術基石

Network

Eucalyptus

Eucalyptus

- <http://open.eucalyptus.com/>
- 原是加州大學聖塔芭芭拉分校 (UCSB) 的研究專案
- 目前已轉由 Eucalyptus System 這間公司負責維護
- 創立目的是讓使用者可以打造自己的 EC2
- 特色是相容於 Amazon EC2 既有的用戶端介面
- 優勢是 Ubuntu 9.04 已經收錄 Eucalyptus 的套件
- [Ubuntu Enterprise Cloud powered by Eucalyptus in 9.04](#)
- 目前有提供 Eucalyptus 的官方測試平台供註冊帳號
- 缺點：目前仍有部分操作需透過指令模式

關於 Eucalyptus 的更多資訊，請參考

<http://trac.nchc.org.tw/grid/wiki/Eucalyptus>

OpenNebula

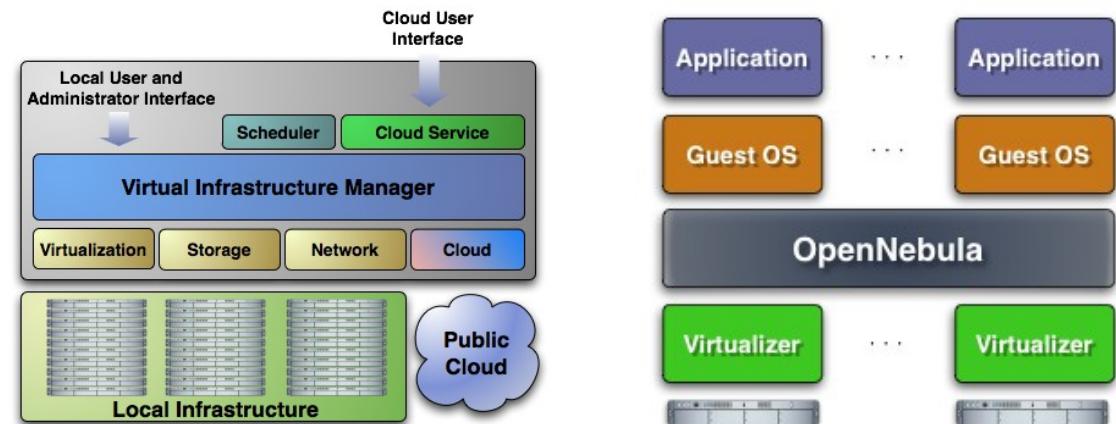

- <http://www.opennebula.org> **OpenNebula.org**
- 由歐洲研究學會 (European Union FP7) 贊助
- 將實體叢集轉換成具管理彈性的虛擬基礎設備
- 可管理虛擬叢集的狀態、排程、遷徙 (**migration**)
- 優勢是Ubuntu 9.04 已經收錄 OpenNebula 的套件
- 缺點：需下指令來進行虛擬機器的遷徙 (**migration**) 。

QEMU, OpenVZ, ...

硬體設施 Hardware

Infrastructure: Computer, Storage,
Network

Hadoop

- <http://hadoop.apache.org>
- Hadoop 是 Apache Top Level 開發專案
- 目前主要由 Yahoo! 資助、開發與運用
- 創始者是 Doug Cutting，參考 Google Filesystem，以 Java 開發，提供 HDFS 與 MapReduce API。
- 2006 年使用在 Yahoo 內部服務中
- 已佈署於上千個節點。
- 處理 Petabyte 等級資料量。
- Facebook 、 Last.fm 、 Joost ... 等著名網路服務均有採用 Hadoop 。

Sector / Sphere

- <http://sector.sourceforge.net/>
- 由美國資料探勘中心 (National Center for Data Mining) 研發的自由軟體專案。
- 採用 C/C++ 語言撰寫，因此效能較 Hadoop 更好。
- 提供「類似」 Google File System 與 MapReduce 的機制
- 基於[UDT高效率網路協定](#)來加速資料傳輸效率
- [Open Cloud Consortium](#)的 [Open Cloud Testbed](#)，有提供測試環境，並開發了[Ma1Stone效能評比軟體](#)。

快速佈署內網搜尋引擎的軟體工具 Crawlzilla

- 雲端運算在大型資料分析、資料探勘方面的示範應用
- 可協助企業或校園建置內網的網站、檔案搜尋
- 支援叢集式安裝、中文分詞，並提供網頁管理介面
- 更多資訊詳見專案網站：<http://code.google.com/p/crawlzilla>

Role #2: Interoperability Standard between Clouds ! 角色二：跨越不同雲端服務的互通標準！

IBM、思科（Cisco Systems）等 20 多家科技公司於 2009 年 3 月 30 日發佈「開放雲端宣言」（Open Cloud Manifesto），希望為雲端運算建立標準，確保業者間的相容性，讓客戶更容易轉換平台。

「客戶使用雲端運算的經驗愈多，就愈明白相容性有多重要。他們不想被綁死在單一業者。」

— IBM 開放標準部門副總裁諾斯沃西（Karla Norsworthy）

OGF ANNOUNCES OPEN CLOUD COMPUTING INTERFACE (OCCI) WORKING GROUP

OGF Officially Launches Working Group To Create An API For Cloud Infrastructure Services

CHICAGO, 28 April 2009 The Open Grid Forum (OGF) has officially launched the Open Cloud Computing Interface Working Group (OCCI-WG). Its aim is the rapid development of a clean, open API for cloud infrastructure delivered on-demand. Infrastructure as a Service (IaaS) is one of three primary segments of the emerging cloud industry in which compute, storage and network resources are provided as a service. The API will be based on existing service provider functionality, and will cover management of the entire life-cycle of virtual machines and other similar workloads (including virtual private servers and physical dedicated servers). It will as much as possible complement and build on existing work such as the Open Virtualisation Format (OVF), as well as serving as an integration point for others standards efforts including DMTF and SNIA.

Craig Lee, OGF's President, stated: "OCCI is an extremely important development that will define a much needed, open standard API in the cloud space. This is, however, just the first step of many. We are committed to working with all stakeholders and organizations to move the ball forward. As always, OGF strives to facilitate productive technical environments for work across the spectrum of distributed computing technologies."

Existing specifications for cloud infrastructure services (including the Amazon EC2 API and Sun Cloud APIs) are provided by single vendors and OCCI will be the first multi-vendor initiative to deliver a royalty-free, open standard API. This will improve cloud computing interoperability and increase competition in the space, facilitating the emergence of a marketplace of services, which will in turn increase customer choice and decrease the risk of vendor lock-in. OCCI will also be important enabler for the creation of hybrid cloud architectures that bridge multiple data centers and cloud services, through adapters and tooling that support the open API. This and related open standards will lower the cost of migration to and from public clouds, delivering automated management of peak capacity, minimizing outages and reducing costs.

OCCI will rely heavily on existing Internet standards and work already done by cloud providers, so as it is easy to both implement and consume. This will benefit software vendors and service consumers alike. For example software vendors who wish to deliver their applications as a service

數位時代 Beta 3.0 - Topics and Links 新聞精選

全球廿五間科技公司將攜手合作，計畫促進更健全、更開放的雲端科技。

這項稱作OpenStack的合作計畫在今天公布，以IT代管服務公司Rackspace和美國太空總署NASA為首，將以Open Source（開放程式碼）的方式，把雲端平台的技術分享到世界每一個角落。

有了OpenStack以後，任何一個想要提供雲端服務的單位，只要準備好伺服器和網路，就可以下載OpenStack的開放軟體，架設自己的雲端平台。目前這個計畫的網站提供了兩套軟體：OpenStack Compute用來設定和管理大量的伺服器，而OpenStack Storage則提供一套雲端儲存系統，只要使用多台一般市面上出售的伺服器，就可以儲存上千兆個位元組的資料。

Rackspace和NASA在這項計畫中，都有卓著的貢獻。Rackspace開放了自家公司產品「雲端檔案」和「雲端伺服器」的程式碼，這兩項產品是該公司雲端設備的基礎。NASA也將貢獻出他們用以架設「Nebula雲端平台」的技術。

藉由開放程式碼的方式，增加不同雲端科技產品之間的互通性。

參與這項計畫的公司還有Intel、Dell、Citrix等，而其他知名公司如Microsoft也在陸續洽談中。這個計畫的目標，是希望為雲端科技提供一個良好的開發環境，同時藉由開放程式碼的方式，增加不同雲端科技產品之間的互通性。這樣一來，雲端科技一旦有了新的突破，不同的產品都能夠同時受惠。

美國結合產學資源，成立 Open Cloud Consortium，
並建立 Open Cloud Testbed，作為人才培育與研究的開放平台。

會員包括：Aerospace、Booz Allen Hamilton、Cisco、Infoblox、MIT Lincoln Labs、NASA Ames Research Center、Northwestern University、Open Data Group、Raytheon、Sector Project、SIOS、University of Illinois at Chicago、Yahoo、Calit2、Johns Hopkins University、National Lambda Rail、University of Chicago

Testbed

The Open Cloud Consortium (OCC) operates a wide area testbed for cloud computing called the Open Cloud Testbed. The testbed is being rolled out in phases. We are currently in Phase 2 of the roll out.

As far as we know, the Open Cloud Testbed is the only wide area cloud that utilizes wide area 10 Gb/s networks. If you know of any other such clouds, please let us know.

國網中心 2009 年開放實驗叢集間接促研究成果

- 國網中心於 **2009** 年四月啓用 **Hadoop** 實驗叢集，目前共 **21** 台 **PC** 服役中。
 - 促成台大資工系資訊網路與多媒體研究所發表論文至 **ACM Multimedia 2009**
 - 自 **2009** 年四月至 **2010** 年八月，雲端實驗叢集共註冊 **937** 人，服務 **37** 個學術單位、**5** 個研究單位、**19** 間業界公司、**2** 所醫院。累計於 **14** 個月執行 **16,424** 個 **Job**。

Canonical Image Selection and Efficient Image Graph Construction for Large-Scale Flickr Photos

ABSTRACT

Efficient image search clustering is prominent for image search engines for exponentially growing photo collections. In this work, we propose an image search clustering approach which selects multiple canonical images from image search results and constructs image clusters in real time on an image subgraph for the search results. The efficiency is achieved with the help of offline-computed image context graphs by distributed computing methods. Extending our prior works, we demonstrate the results of the proposed canonical image selection and preliminary outcomes of large-scale image graph construction in this proposal. We experiment in Flickr550 dataset, containing 540,321 Flickr photos.

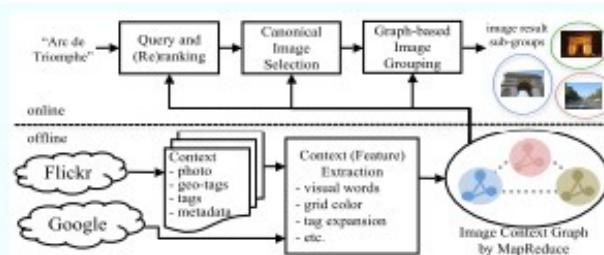

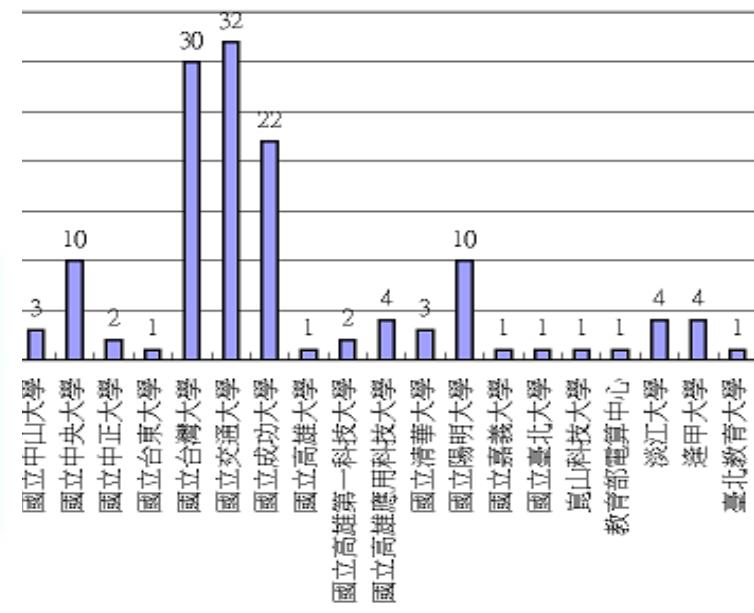

Figure 1: The system diagram: online query reranking, canonical image selection, and image result grouping are based on the image context graph, constructed offline by Hadoop MapReduce over rich context features in Flickr photos.

Conclusion: Open Source as a Strategy !!

未來自由軟體將成為吸引注意力的一種策略

當免費、開放才能吸引使用者或開發者的注意力～
自由軟體就會變成一種行銷策略，將不得不開放！！
